Humpback Whales

Whales swim in all of the world's oceans. They are mammals and only have one baby every couple of years. With such a slow reproduction rate, it wasn't long before whale populations declined due to pollution and hunting. Whales are doing better now, but wouldn't it be great if they were to reproduce as fast as humans do?

International wildlife veterinarian, Jennifer Conrad, DVM, uses art to express the joy of animals. This card has purpose. It provides funds for the veterinary needs of animals around the world, and it provides a striking, environmentally friendly, art card for the humans who care. Everybody wins.

The Paw Project will receive a portion of the proceeds from the sale of this card to finance reconstructive surgery for tigers and lions whose feet have been crippled by the cruel practice of declawing.
